DETAILED ACTION

Claim Objections

1. Claims 16 and 34 are objected to because of the following informalities:

In claim 16, line 6, "the drive currents" has no antecedent basis. Therefore, "the drive currents" should be changed to --drive currents--.

Claim 34 is objected to because it is a substantial duplicate of claim 30. The Examiner suggests Applicant canceling any one of these claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 16-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16, line 14 recited "a current generator circuit which generates said predetermined drive current". There is a predetermined drive current for a current mirror circuit of each IC. Therefore, it is unclear if "said predetermined drive current" refers to "the predetermined drive current of the first IC" or "the determined drive current of the second IC".

The deficiency is found in claim 25, which requires the same correction.

Art Unit: 2821

Claim 17, line 6 recites "said current mirror circuit". It is unclear if "said current mirror circuit" refers to "the current mirror circuit of the first IC" or "the current mirror of the second IC".

The deficiency is found in claim 25, which requires the same correction.

Claims 18-24 and 26-34 are rejected because of their dependencies.
